

AVAILABILITY™
for the Modern Data Center

Veeam ONE

Complete visibility for backup and virtual environments

Veeam ONE was the Editor's Choice Award winner for Virtual Management & Optimization in the 2013 Virtualization Review Reader's Choice Awards and a 2-time Best of VMworld award winner.

"We were interested in implementing a virtualization management tool that would allow us to monitor and run reports for our VMware environment, and the Veeam One product has proven to be a good solution. It provides us with really valuable information and analysis on network, disk, memory and CPU usage, so capacity planning has become easier and much more effective than before."

John Walsh
Manager of Processing & Information Platform Services,
Cyberinfrastructure

Veeam is an Elite VMware Technology Alliance Partner and a charter member of the VMware Ready Management program.

Microsoft Partner

Gold Application Development
Gold Datacenter

Veeam is a Microsoft Gold Certified Partner with competencies in ISV, and Management and Virtualization.

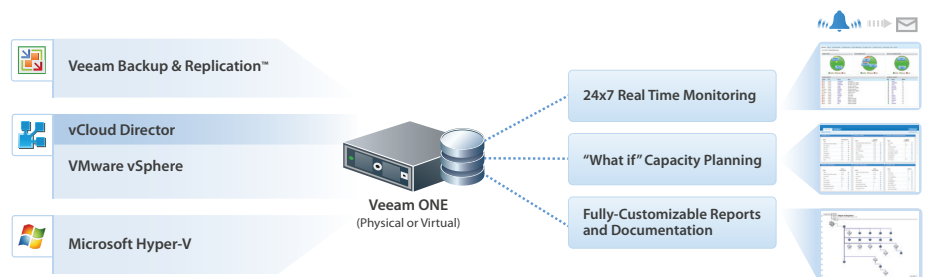

Veeam ONE has been verified by VMware as VMware Ready.

Veeam® ONE™ is a powerful monitoring, reporting, and capacity planning tool for VMware vSphere, Microsoft Hyper-V and the Veeam backup infrastructure. It helps enable *Availability for the Modern Data Center™* by providing complete visibility of the IT environment to detect issues before operational impact.

Maintaining modern data center availability

Veeam ONE is an integral part of delivering *Availability for the Modern Data Center* by providing complete visibility and control of your virtual and backup environments. It helps overcome the increasing challenges you will face while working to meet the needs of the Always-On Business™ through:

- **24x7 real-time monitoring and alerting** notifying you of backup and performance issues before users are affected
- **Resource optimization and capacity planning** that removes the guesswork from planning and provides complete visibility of resource usage across your entire infrastructure
- **Fully-customizable reporting** designed to simplify backup compliance auditing requirements and provide concise pictures of resources and workloads.
- **Over 25 backup reports** designed to help maintain system availability.

Veeam ONE provides complete visibility of the IT environment.

Complete visibility that pays

Veeam ONE provides complete visibility of your virtual and backup environments to help you protect the data that matters most. It's powerful, easy to use and delivers a fully integrated solution at a competitive per-socket price.

Advanced alarms

Veeam ONE includes over 200 pre-set alarms based on advanced analysis, best practices and years of experience. You can also create custom alarms based on past performance.

Dashboards

Dashboards offer at-a-glance health assessments of your backup and virtual infrastructures. Predefined graphs and charts provide complete visibility of your performance along with one-click, drill down access to granular details, if needed.

Veeam ONE Free Edition

Try Veeam ONE [free](#) and learn for yourself! The Free Edition lets you experience the benefits Veeam ONE brings to your backup and virtual environments.

Supported Environments

VMware infrastructure*

Platforms

- vSphere 5.x
- vSphere 4.x

Hosts

- ESXi 5.x
- ESX 4.x
- vSphere Hypervisor (free ESXi)

Software

- vCenter Server 5.x (optional)
- vCenter Server 4.x (optional)
- vCloud Director 5.1, 5.5 (optional)

**Only English version of VMware infrastructure is supported*

Microsoft infrastructure

Platforms

- Windows Server 2012 R2
- Windows Server 2012
- Windows Server 2008 R2 SP1

Hosts

- Windows Server Hyper-V 2012 R2
- Microsoft Hyper-V Server 2012 R2 (free)
- Windows Server Hyper-V 2012
- Microsoft Hyper-V Server 2012 (free)
- Windows Server Hyper-V 2008 R2 SP1
- Microsoft Hyper-V Server 2008 R2 SP1 (free)

Software

- Microsoft System Center Virtual Machine Manager 2012 R2 (optional)
- Microsoft System Center Virtual Machine Manager 2012 (optional)
- Microsoft System Center Virtual Machine Manager 2008 R2 SP1 (optional)

Backup infrastructure

Platforms

- Veeam Backup & Replication v8
- Veeam Backup & Replication v7
- Veeam Backup & Replication 6.5 (compatible)

Hosts

- Veeam Backup & Replication server
- Veeam Backup Enterprise Manager (optional)

Advanced Monitoring, Reporting, and Capacity Planning

24x7 real-time monitoring

Veeam ONE provides real-time, agent free and unattended 24x7 monitoring of your backup and virtual infrastructures, notifying you of backup and performance issues before applications and users are negatively impacted. It also performs fast troubleshooting by providing information you need to pinpoint root cause and easily resolve issues, providing advanced up-to-date alerting capabilities to guarantee your business remains always-on.

NEW! Multi-tenant reporting and monitoring

Version 8 also introduces multi-tenant reporting and monitoring for VMware. Now, IT managers can delegate reporting and monitoring to system admins over a limited scope of assigned VMs. Admins can monitor and customize reporting for their own VMs while managers can pre-build backup reports for the entire team, pre-populating individual dashboards with filtered results, saving the department hours of valuable time each month. Managed Service Providers offering infrastructure-as-a-service can also leverage this feature by offering discreet, self-service monitoring and reporting for tenants, improving their overall service offering and forever eliminating time consuming, manually generated reports for each customer.

NEW! Infrastructure Assessment Reports

Infrastructure assessment reports help monitor repository requirements for your VMs and backup readiness. The infrastructure assessment report provides VM configuration analysis reporting on all unsupported configurations and possible issues that may occur during backup jobs. Veeam ONE v8 also includes assessment reporting to verify your Veeam Backup & Replication installation meets all known best practices adding an additional layer of visibility.

NEW! Advanced Capacity Planning with "What If" Analysis and Resource Reservations

Veeam ONE removes the manual guesswork from safely removing VMs or hosts from your infrastructure with heterogeneous Advanced Capacity Planning. Fully automated "What-if" planning makes system changes and upgrades worry-free by providing accurate suggestions for resource reservations, forever eliminating manual calculations from planning, and providing support for concurrent deployment projects.

Fully-Customizable Reporting and Documentation

Veeam ONE's documentation and management reporting will save you hours each month while assisting with crucial planning and operational functions.

- Detailed reports serve as helpful tools simplifying audits and proving backup compliance standards are met.
- Reports are easy to schedule and customize, from high-level weekly performance assessments for board members to detailed documents for IT staff meetings.
- **NEW!** Advanced reporting functionality allows you to pull data from any field and from any report into one, all-purpose document providing even more visibility and control.
